1. Executive Summary

Fab Luxe will be positioned online with a premium, brand-led website benchmarked against leading developers (e.g., Lodha), backed by an intelligent lead-generation engine. Visitors are engaged by an on-site AI conversational agent that qualifies interest and confirms genuine, reachable buyers through OTP / CAPTCHA verification, then routes them instantly to WhatsApp, the CRM and the sales team.

Around this, we run a full-funnel marketing programme — SEO, Local SEO, SEM (Google Ads), SMO/SMM, and a steady stream of graphic and video content — measured end-to-end. The commercials below are structured as a one-time build, a monthly management retainer, and pass-through costs (AI, messaging, hosting and ad spend) billed at actuals, so you only pay real usage for AI and messaging.

As a lean, specialist studio, our rates are kept competitive and transparent — premium quality and hands-on service without big-agency overheads.

2. Scope of Work

2.1 Premium Website (Lodha-benchmark)

- Custom, brand-led design: immersive hero, project & residence pages, gallery, amenities, location, about, blog, contact.
- Fully responsive, fast (Core Web Vitals optimised), CMS-managed for easy updates.
- Enquiry forms, floor-plan/brochure downloads (gated), WhatsApp & call CTAs on every page.
- SEO-ready structure, JSON-LD schema, analytics & tracking baked in.

2.2 Conversational AI Agent + OTP + Social Integration

- On-site AI chat agent that greets, qualifies (budget · BHK · timeline · location) and captures buyer details 24/7.
- OTP verification (SMS-DLT or WhatsApp) and CAPTCHA to confirm real, reachable buyers and filter spam/fake numbers.
- Integration with WhatsApp, Instagram & Facebook messaging, plus click-to-WhatsApp; verified leads pushed to CRM and assigned to sales.
- Handover of chat transcripts and lead status; escalation to a human when needed.

2.3 SEO & Local SEO

- Technical + on-page SEO, schema, sitemap/robots, Search Console & GA4.
- Local SEO: Google Business Profile optimisation, maps visibility, reviews & citations for Greater Noida West and NCR.

2.4 SEM — Google Ads

- High-intent search, display & performance-max campaigns and click-to-WhatsApp lead ads; continuous optimisation on CPL and conversions (ad spend billed separately, at actuals).

2.5 SMO / SMM — Social Media

- Organic posting, community management and paid boosting across Instagram, Facebook (and LinkedIn/YouTube as needed); content calendar and audience growth.

2.6 Graphic Design & Video Content

- Brand creatives, post & ad graphics, reels/shorts and long-form walkthrough videos; a launch batch plus a monthly production quota.

2.7 Analytics & Reporting

- Unified dashboards with weekly and monthly reporting on traffic, leads, qualified leads, CPL, conversion rate, revenue and ROI.
